The extensive fossil record of genera and species is testimony that dinosaurs were diverse animals, with widely varying lifestyles and adaptations. Their remains are found in sedimentary rock layers (strata) dating to the Late Triassic Epoch (approximately 237 million to 201.3 million years ago). The abundance of their fossilized bones is substantive

SCARY Dinosaur Roars!

For 160 million years, dinosaurs ruled the Earth. These prehistoric lizards ranged in size from the size of hummingbirds, to lumbering giants the size of a truck. They were reptiles, but very different from modern-day reptiles. Birds are the closest living relatives of the dinosaurs.
