LT3300 - 5.7" All-in-One HMI | Pro-face America

In a basement with unframed walls, install faced insulation in horizontal runs, starting at the sill above the wall. Position a furring strip over the flange of the top run. Drive nails through the furring strip and flange into the sill.

How to Install Home Insulation | Lowe's

When installing Fel-Pro exhaust manifold gaskets, if there is a smooth, metallic side and a composite side, the metallic side should be installed facing out, meaning toward the exhaust manifold. This smooth surface of the shiny side will allow the flange of the exhaust manifold to slide as it expands and contracts during heat cycling from engine operation.

Which Direction do you Install a Gasket? | Fel-Pro Gaskets
